

# CAP Needs You

Over sixty years ago the Civil Air Patrol guarded America's shores from attack by foreign submarines. Today we're going "*back to the future*" to once again become the **Eyes of the Home Skies.** We need both pilot and non-pilot aircrew, ground team, medics, and radio operators.

Civil Air Patrol provides training to perform mission specialties. Pilots must have at least an FAA private pilot license, current medical and current BFR.

**Headquarters  
New Jersey Wing Civil Air Patrol  
United States Air Force Auxiliary**
